

Summary of donor engagement policy

Africa Now supports small scale producers and businesses to benefit from sustainable markets and ethical trade. Africa Now will neither accept financial contributions from nor work with any organisation whose operations are assessed to be directly detrimental to our beneficiaries or contrary to the core aims of the charity. Where Africa Now does accept funding, donations or services from a third party, this does not constitute Africa Now's endorsement of goods, services or overall work of that organisation.

Africa Now's Ethical Business Service supports companies seeking to ensure that goods that are produced and sourced in an ethical way, in accordance with the International Labour Organisation conventions. Africa Now will work with organisations that do not currently meet the standards of these conventions if they are making a genuine effort to re-evaluate and re-adjust their operations.
